

CONSTRUCTION & INSTALLATION

MAINTENANCE

QUALITY

We have over 40 years of experience working directly with military installations, contractors, and construction companies for both new construction and renovation projects. We are familiar with a wide range of HVAC solutions and our knowledgeable technicians are fully trained to help you identify which solutions will work best for your specific building and its anticipated uses. We have designed commercial solutions for stores, shopping centers, churches, office buildings, high rise condominiums, hotels, restaurants, and educational institutions.

No HVAC solution would be complete without a clear maintenance schedule. Bennett Air offers a wide range of maintenance and service contracts, so you can pick the one that best suits your needs. Our knowledgeable and friendly technicians are fully prepared to make sure that your equipment runs smoothly for years to come. We take a proactive approach to maintenance, reminding you when service is due to keep your system in its optimal condition.

Our designers are well-versed in HVAC technologies. We easily create innovative solutions that use the highest quality materials pieced together with precision engineering. This lets us optimize your HVAC solution in terms of energy efficiency and cost effectiveness. During implementation, we do everything possible to stay within the promised budget and timeframe because we understand the chaos that can be created by cost overruns and delays. With Bennett Air, you can rest assured that our HVAC solution will never hold back the rest of your construction or renovation project.

Happy Homeowners

SERVICE

Winter, spring, summer or fall just call and we'll be there! Our focus is to build a relationship with our customers and perform quality work at an affordable price.
